Carmaster Digital Service Platform

Powered by Workshop Pro | Marketing Analysis & Feature Positioning Document

This document summarizes the current Carmaster platform capability, marketable value, and visual proof of each key module, based on the live app environment.

Prepared: 8 March 2026

Executive Summary

Carmaster operates a unified operations and customer engagement platform: a staff portal for workshop management and a public PWA for customer-led job capture. The product combines CRM, jobs, quotes, invoices, reminders, and branded self-service booking into one workflow.

Target users
Workshop owners, service advisors, technicians

Core value
Faster intake, less admin, better follow-up conversion

Differentiator
Staff + customer PWA workflow in one stack

Marketable Product Capabilities

Operations Control

- Centralized job lifecycle management with search, status handling, and due-date visibility.
- Customer records tied to vehicle rego, contact data, and historical jobs.
- Automated service schedule and renewal reminder monitoring.

Revenue Workflow

- Quote creation and sharing pipeline with digital decision handling.
- Invoice workflow with PDF generation and outbound communication support.
- Upsell and package support for maintenance monetization.

Customer Experience

- Installable public PWA for quick self-service booking and repair requests.
- Mobile-first intake with WOF/Rego context and guided form progression.

Platform & Security

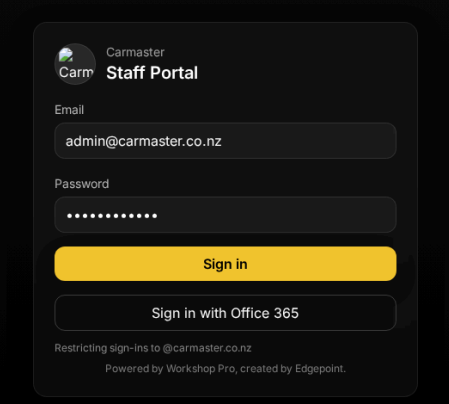
- JWT-authenticated staff portal + Office 365 SSO support.
- Public endpoint throttling and validated request contracts.

- Branded experience: Carmaster identity with “powered by Workshop Pro”.
- Configurable settings for business branding and service catalogs.

Feature Screenshots (Current System)

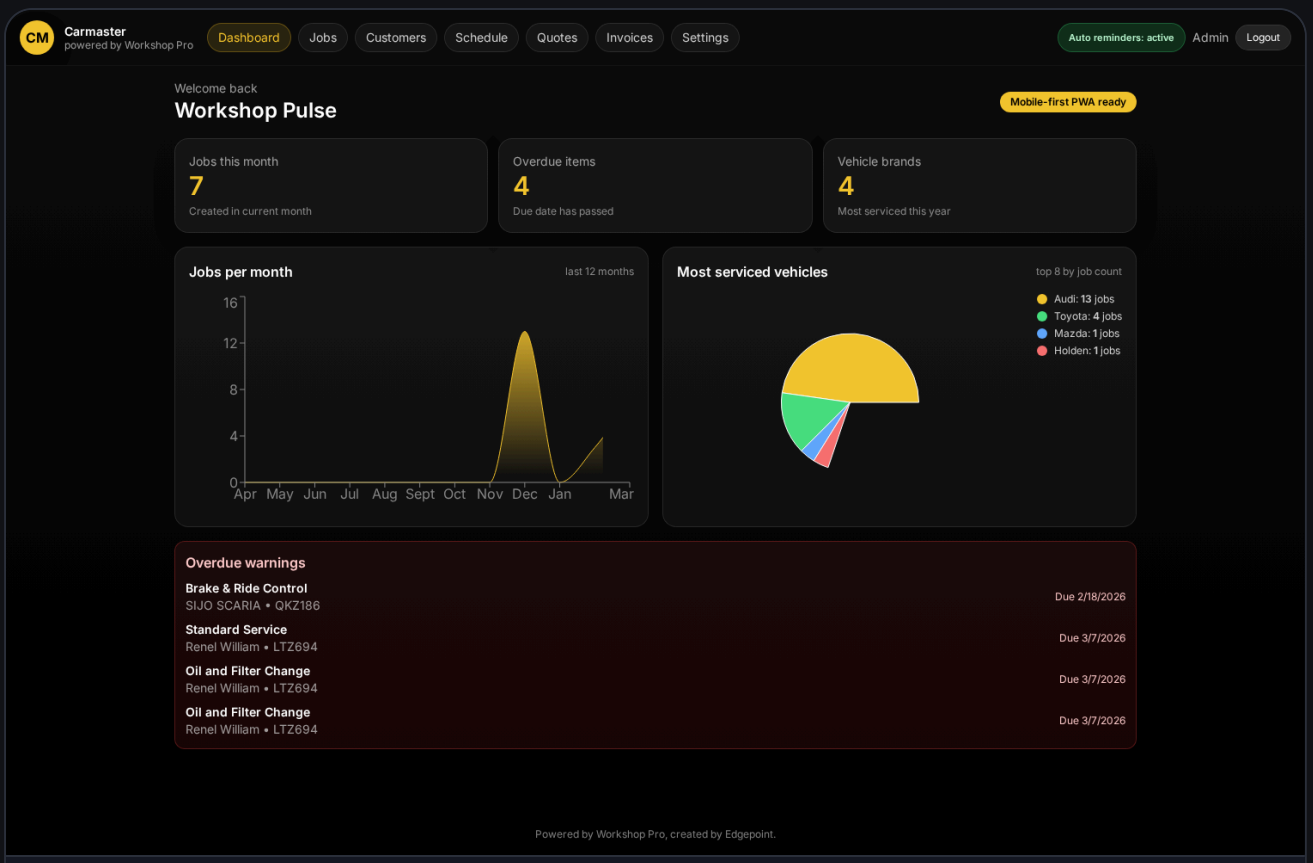
Each image below is captured from the running application and maps directly to a marketable feature.

1) Staff Login & Secure Access



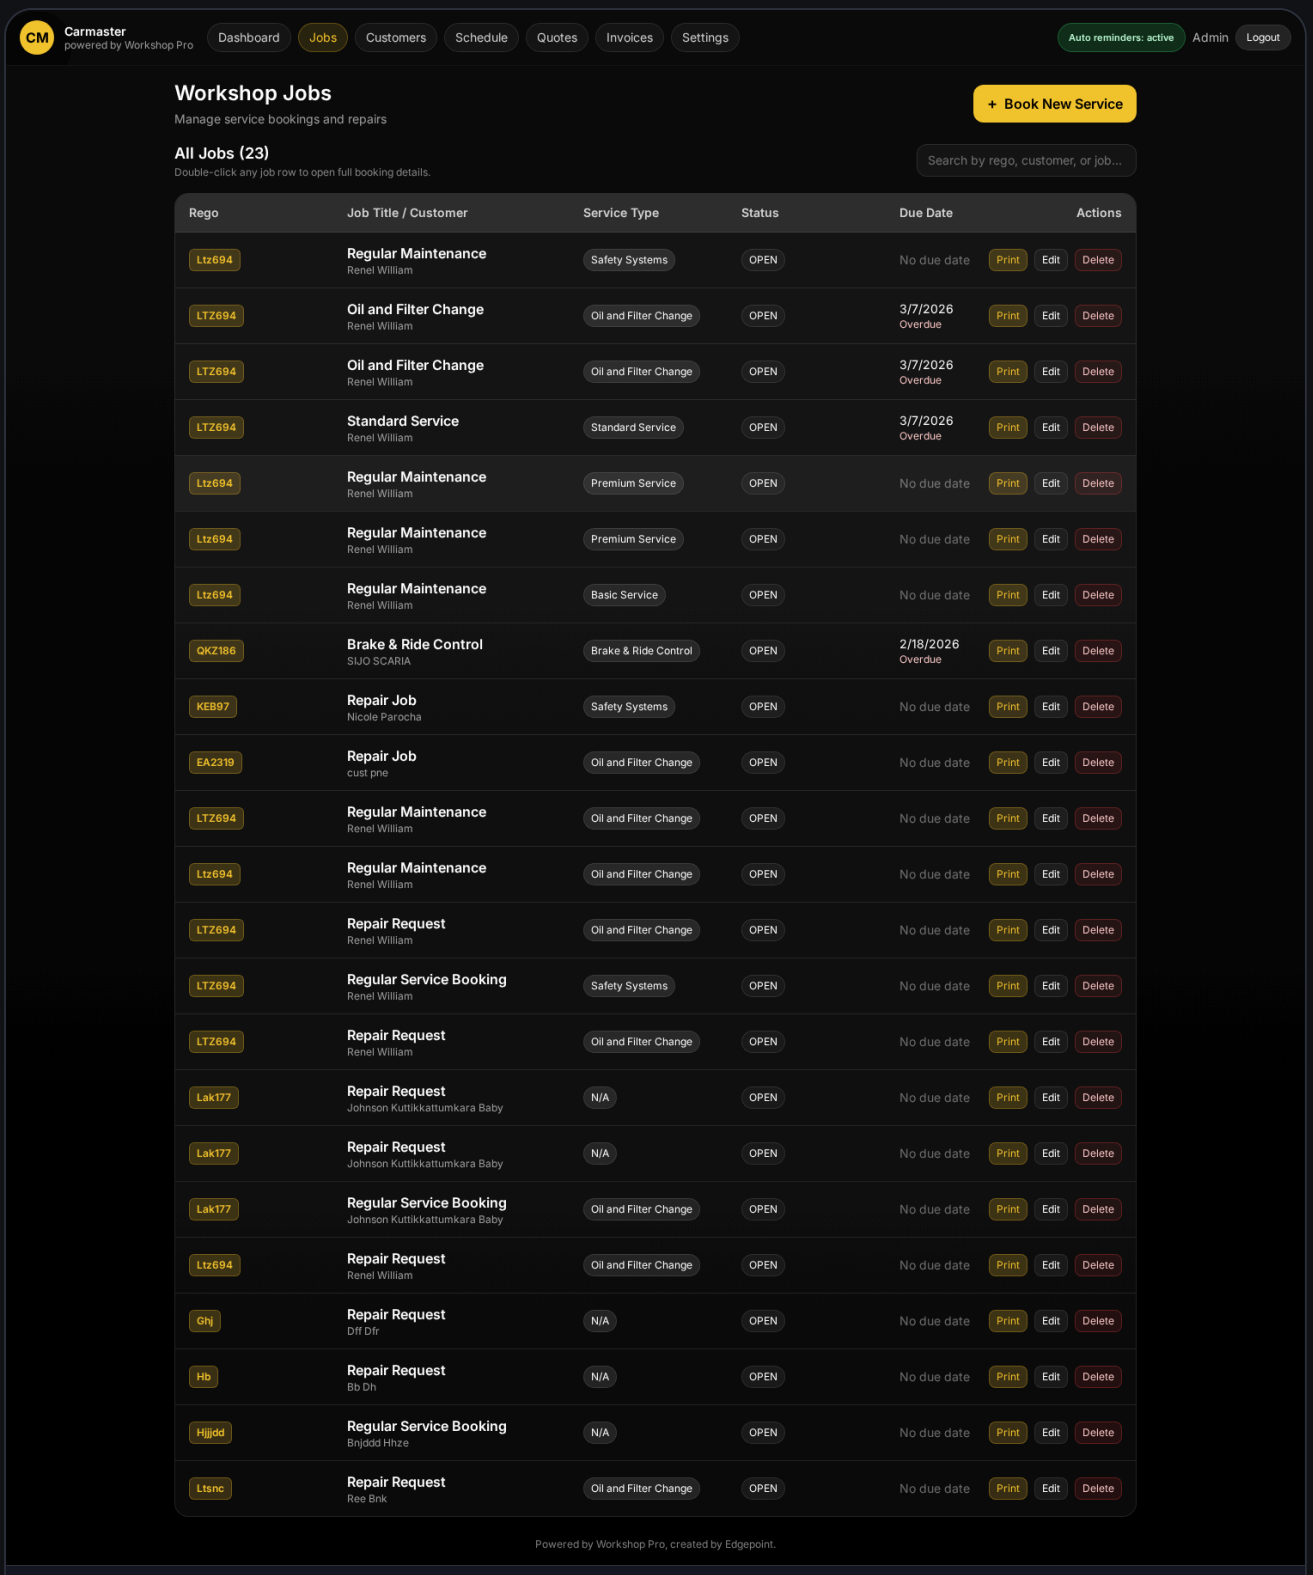
Staff access gateway with role-based portal entry and Office 365 path.

2) Dashboard & Performance Visibility



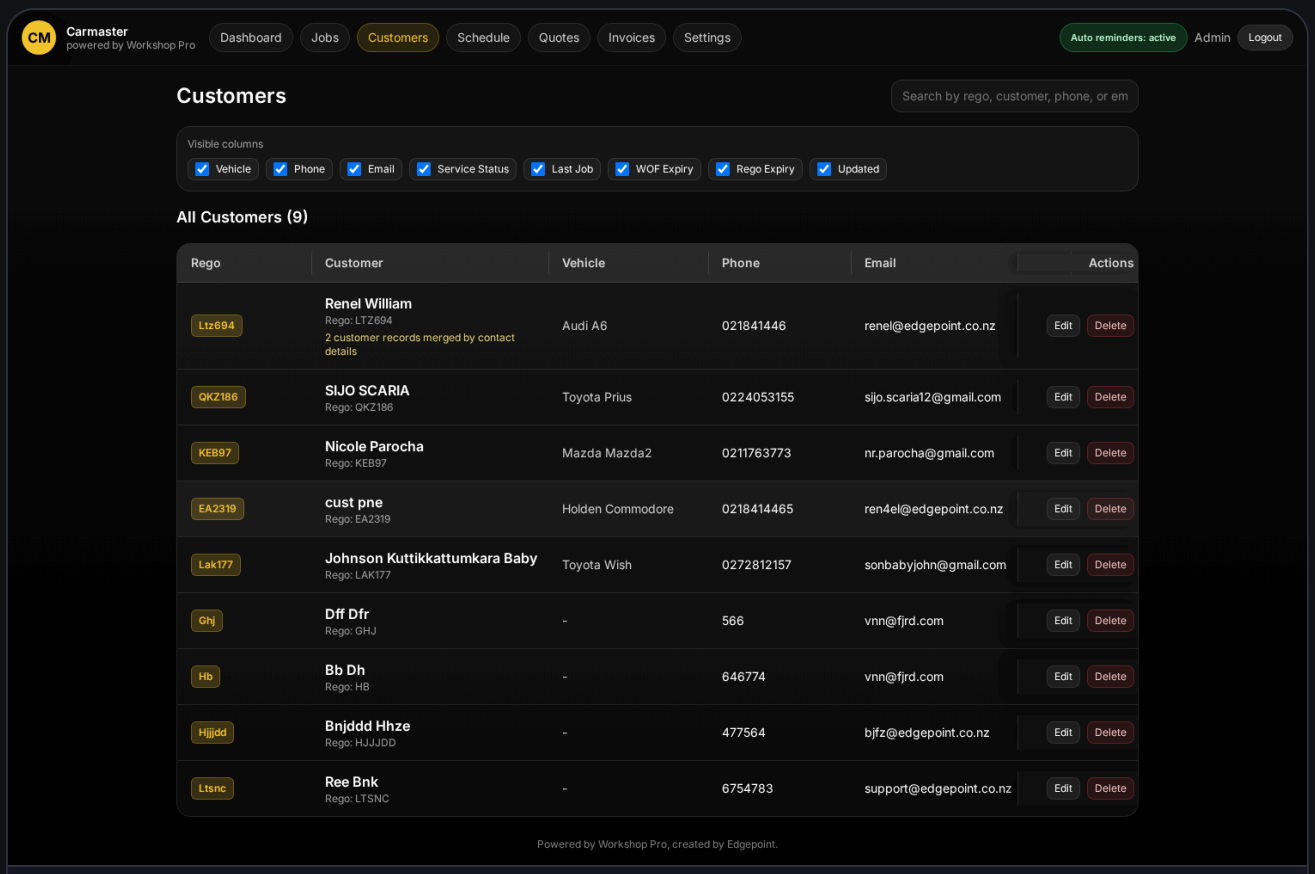
Executive snapshot with monthly job trends and workload visibility.

3) Jobs Management



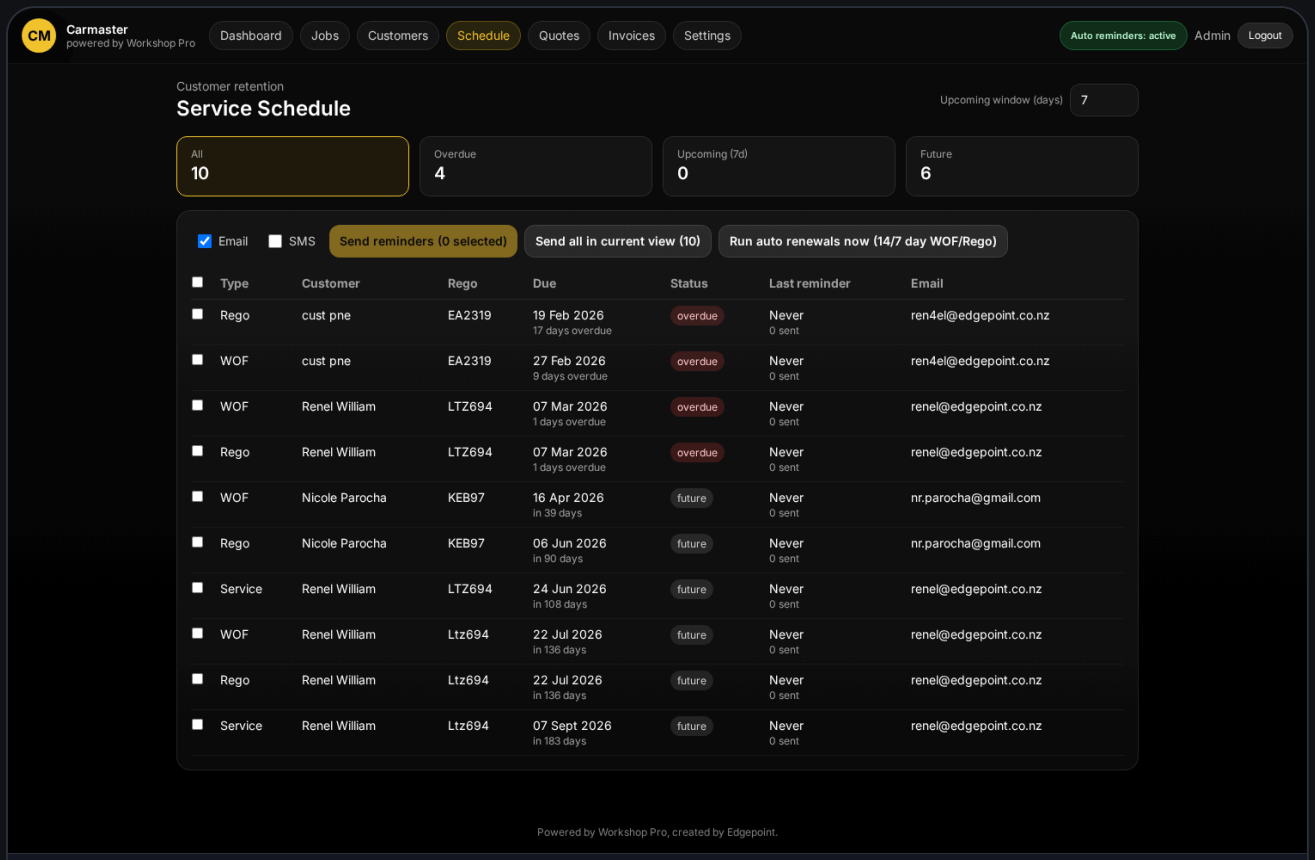
Operational command center for service/repair jobs and job-level actions.

4) Customers CRM



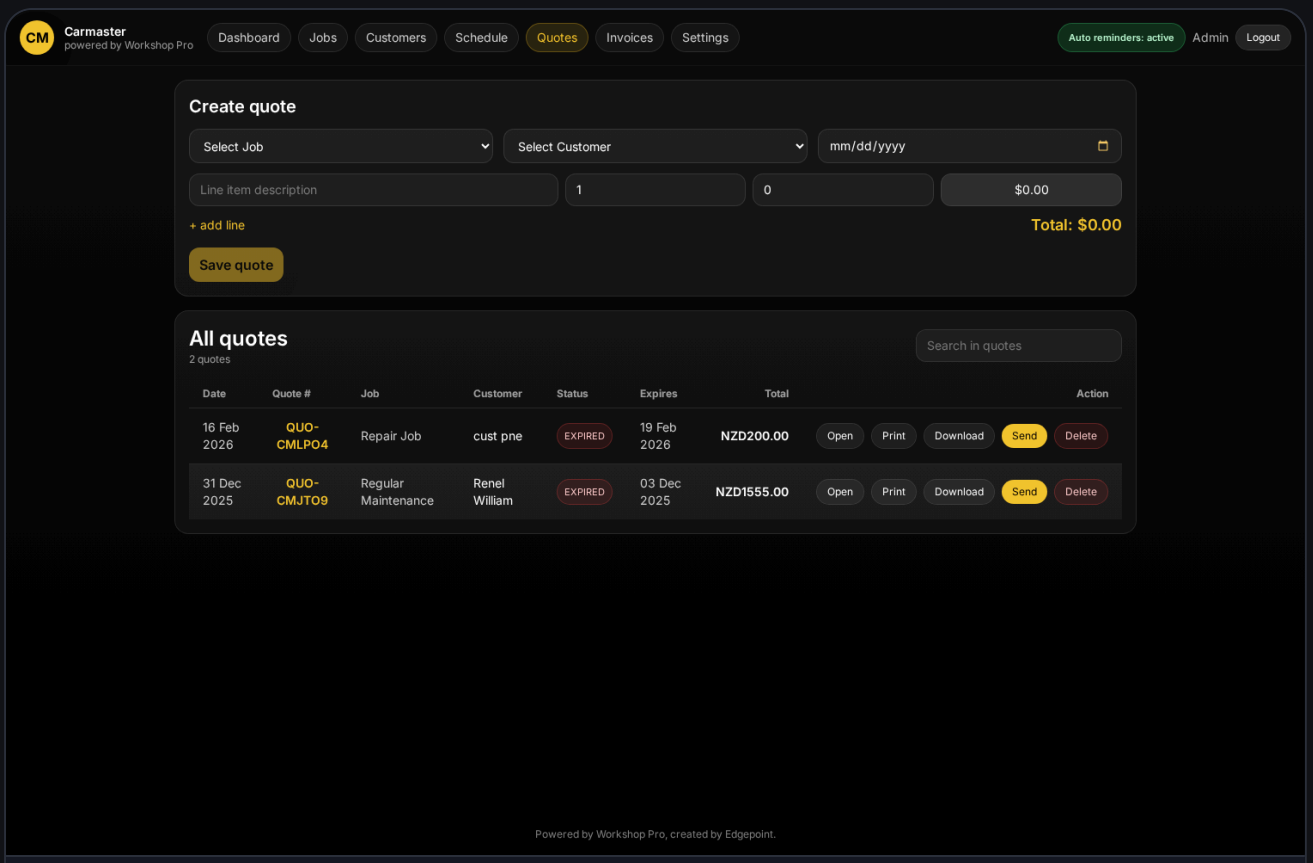
Customer and vehicle-centric records, supporting retention and context-driven service.

5) Service Schedule & Renewals



Service scheduling and reminder oversight for recurring business continuity.

6) Quotes Workflow



Quote management pipeline designed to shorten decision-to-approval time.

7) Invoicing Workflow

Positioning Angles for the Marketing Website

- **“One system, full workshop lifecycle”:** from lead intake to invoice and reminder automation.
- **“Mobile-first customer conversion”:** QR + PWA experience reduces friction for new bookings.
- **“Admin-light operations”:** integrated jobs, CRM, quotes, and invoices reduce system switching.
- **“Brand-safe rollout”:** Carmaster front-facing identity with Workshop Pro technology attribution.

Suggested CTA Blocks

- Book a live demo
- See a workshop workflow walkthrough
- Launch your branded portal in days
